

AFPM members know that petrochemicals are invaluable to the production of countless consumer products. But many Americans may not realize how much they rely on xylene, benzene, butadiene, toluene, ethylene and propylene when they opt to spend time outside. From tent floors made of ripstop nylon to the hydrophobic treatments that keep down sleeping bags warm and dry, petrochemicals keep Americans exploring.

For outdoor retailers who want to build the best products, materials like polyester and nylon — both made from petrochemicals — are irreplaceable. Nylon is durable and often used in things like backpacks and tents, while polyester is soft and is commonly found in moisture-wicking active wear and the insides of sleeping bags.

polyester

MOISTURE WICKING

xylene

polyurethane-treated leather

WATERPROOF

benzene

rubber

DURABLE AND FLEXIBLE

butylene (butadiene)

molded EVA (ethylene-vinyl acetate)

ABSORBS SHOCK

ethylene

• nylon

TEAR RESISTANT

benzene

butylene  
(butadiene)

• closed-cell foam

COMPRESSIBLE

ethylene

propylene

• polyurethane

WATER RESISTANT

toluene

## polyester

SOFT AND FLEXIBLE

benzene

toluene

## nylon

LIGHTWEIGHT AND DURABLE

benzene

toluene

## elastane

PROVIDES STRETCH

benzene

toluene
