
WASHINGTON, D.C. - Statement from Chet Thompson, President and CEO of the American Fuel & Petrochemical Manufacturers (AFPM) in response to the EPA's proposed RVOs for 2019:

“EPA proposed to double-down on the most failed parts of the Renewable Fuel Standard. Higher cellulosic and biodiesel volumes—that are not connected to reality—would compound problems for consumers and refiners and continue the legacy of [RFS](#) dependence on expensive biodiesel imports. The RFS is a broken mandate and U.S. manufacturers, refiners and consumers are paying the price. Congress must reform this program.”

About AFPM:

The American Fuel & Petrochemical Manufacturers (“AFPM”) is a national trade association representing nearly all U.S. refining and petrochemical manufacturing capacity. AFPM members produce the fuels that drive the U.S. economy and the chemical building blocks integral to millions of products that make modern life possible.
