

**WASHINGTON, D.C. — American Fuel & Petrochemical Manufacturers (AFPM) General Counsel Rich Moskowitz** issued the following statement on the news that the U.S. Environmental Protection Agency (EPA) has [issued a proposal](#) to exercise partial waiver authority for the 2024 cellulosic Renewable Fuel Standard (RFS) obligations:

“AFPM welcomes the news that EPA intends to exercise its waiver authority to address a known shortfall of cellulosic ethanol. The cellulosic RVO for 2024 greatly exceeded cellulosic biofuel production and was impossible to meet. Refiners should not be held liable to purchase fuels or RINs that do not exist.”

Relevant information:

- On November 1, AFPM petitioned the U.S. EPA to waive a portion of the 2024 cellulosic RVO, recognizing the shortfall in RINs and cellulosic biofuel production.
- Turner Mason & Company in October published an analysis of D3 and D7 RIN bank solvency for 2023-2024 and concluded that there is likely to be a shortfall of 115 million RINs for the 2024 compliance year, accounting to insufficient cellulosic biofuel production and a dearth of carryover RINs.

Estimates & Projections	Millions of Cellulosic RINs	Difference	Details
2024 Cellulosic Biofuel Obligation	(1,092)	-	Appendix A
2024 Cellulosic Biofuel RINs Available for Compliance	1,035	(57)	Appendix C
2023 Carryover Cellulosic RINs Available for Compliance	30	(27)	Appendix B
2023 Carryover Cellulosic Biofuel Compliance Deficit	(88)	(115)	EPA Public Data <sup>(a)</sup>

(a) EPA’s Public Data for the Renewable Fuel Standard, Renewable Volume Obligations, Table 6: Total Compliance Deficits by Year, Data as of October 17, 2024 (see <https://www.epa.gov/fuels-registration-reporting-and-compliance-help/annual-compliance-data-obligated-parties-and> )

About AFPM:

The American Fuel & Petrochemical Manufacturers (AFPM) is the leading trade association representing the makers of the fuels that keep us moving, the petrochemicals that are the essential building blocks for modern life, and the midstream companies that get our feedstocks and products where they need to go. We make the products that make life better, safer and more sustainable — we make progress.
