WASHINGTON, D.C. – The American Fuel & Petrochemical Manufacturers (AFPM) has named Texas A&M University as the [winner of the second annual “AFPM Recruitment Challenge”](#). College students from ten campuses around the country competed in the challenge that focused on increasing awareness and interest in the fuel and petrochemical manufacturing industries and the range of career opportunities. Finalists from three schools, selected for their clear and innovative messaging and industry recommendations, competed before a panel of industry experts. The second place prize went to the University of New Mexico, and the third place prize went to Lone Star College-Kingwood.
