

Economic impact: U.S. refining & Alaska

The American Fuel & Petrochemical Manufacturers (AFPM) is the leading trade association representing the makers of the fuels that keep us moving, the petrochemicals that are the essential building blocks for modern life, and the midstream companies that get our feedstocks and products where they need to go. We make the products that make life better, safer and more sustainable — we make progress.

Nationally, the refining industry supports 2.5 million jobs, generates \$278 billion in labor income and adds \$626 billion to the U.S. economy. It contributes \$70 billion in federal and \$73 billion in state and local taxes, funding essential services and infrastructure.

Alaska refineries support and contribute:

Every year, Alaskans consume:
